

Introducing the Vx520 Backplate

Tailwind supports the Verifone Vx520 range of Pin Entry Devices, which delivers reliability, quick transactions, with contactless and NRF payments to support mobile wallets. By securing these devices with a Tailwind backplate and stand not only are you still able to provide the above to customers, but provide your business with a strong, secure, robust solution at your Point Of Sale.

This terminal has four variations:

Verifone VX 520 40mm

Verifone VX 520 49mm

Verifone VX 520 GPRS

Verifone VX 520C

Which Backplate?

To find out which backplate you need for your terminal you can check the paper roll size or check whether your terminal is GPRS or is labelled as VX520c. If you're not sure which terminal type you have, find the terminal code located on the back of the machine as pictured below.

Due to the differences in the plastics for each variant we have created four backplates, one for each terminal type.

The most common codes relating to each terminal types are:

CST00144	CST00145	CST00153	CST00160
40mm	49mm, Dial up	49mm, GPRS	Colour screen
M252-653-A3-EUA-2	M252-753-A3-EUA-3	M252-773-03-EUA-2	M252-693-C7-EUH-3
M252-659-A3-EUC-3	M252-753-03-DMO-2	M252-773-A3-EUA-2	
M252-659-C3-EUC-3	M252-757-03-EUA-A	M252-773-D3-EUA-2	
M252-653-A3-NAA-3	M252-753-03-NAA-3	M252-773-13-EUA-2	
M252-650-03-EUA-2	M252-703-03-NAA-3	M252-773-17-EUH-3	
M252-653-A3-EAU-3	M252-753-03-EUA-3	M252-723-03-EUA-3	
M252-653-C3-EUA-3	M252-75A-A3-EUA-3	M252-725-A3-EUA-3	

If your code is not listed above, email the code to: marketing@tailwind-solutions.com and our staff will check the code and be in touch with the information on the correct backplate you require.

FlexiPole™ Stands

The backplates allow your Verifone VX520 terminal to be securely and invisibly mounted using any of the below Tailwind FlexiPole™ stands including:

COMPLETE

COMPACT

CONTOUR

CONNECT

Tilt

Swivel

Standard

or

Lockable
for extra security

Counter top

or

Wall mounted

FIRSTBASE

Suitable for the majority of retail locations, First-base can be used with almost any Tailwind mounting solution. FlexiPole's unique latching mechanism is fitted as standard.

The latch can be released easily at the back of the mount allowing the machine to be passed directly to a customer, for example to a wheelchair user. You can upgrade your FirstBase to a SafeBase in a simple process: contact us for more details.

SAFEBASE

SafeBase is a secure 'lock and key' base which ensures your card payment machine is completely safe from theft and malicious interference by latching the unit in place and then locking the latch in place with a key. This makes it almost impossible for anyone to gain access to the back of the machine or to steal it.

SafeBase can be used with the above Tailwind stands and offers our most secure base for your payment machine.
