

FLEXiPOLE™ Mounting Solutions
for the Verifone P200/P400

COMPLETE

COMPACT

CONTOUR

Why mount your Verifone P200/P400 payment terminal?

Security

Payment Card Industry Data Security Standards require retailers to:

'Protect devices that capture payment card data by direct physical interaction with the card from tampering and substitution.'

FLEXiPOLE™ stands are lockable for extra security and help to meet with the new PCI DSS regulations.

Protection

FLEXiPOLE™ stands protect from damage, theft & criminal interference, increasing product lifespan.

Switching Solutions

Upgrading your estate? Just buy a new low cost back plate.

Accessibility

Helps to comply with disability legislation.

Strength

FLEXiPOLE™ is made from an extremely strong, easy to clean composite material.

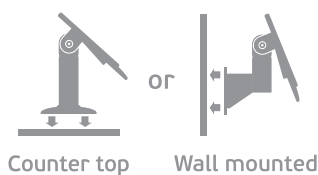

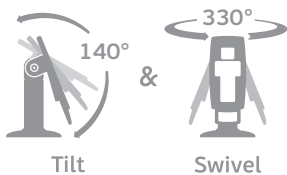

Customer experience

FLEXiPOLE™ provides a clutter free check-out environment and ease of use for customers.

No Interference

Metal stands can interfere with contactless payments, FLEXiPOLE™ offers no interference.
