# NANO Cash Drawer

## Cash Drawer Solutions To Fit All Environments

APG's Custom & Bespoke range delivers a cash drawer tailored to fit the exact needs of leading retailers worldwide. For over 40 years we have developed solutions to every type of cash handling problem encountered at the Point of Sale. From enhanced security options, to different insert configurations and specially adapted cash drawers to fit unique PoS designs, there is always a solution available to pick from to meet your requirements.

The NANO has been designed to meet growing demand for very small footprint drawers with a width of under 300mm to fit into the smallest spaces and maximise counter space. The NANO drawer is the perfect platform for the latest ultra-small EPoS terminals and is suitable for any retail and hospitality environment where space is at a premium.

### Highly Durable

Featuring a very robust steel construction with steel ball bearing runners for a prolonged operational life, therefore it is suitable for the busiest of retail environments.

### Tablet PoS Solutions

The narrow width of the NANO is ideally suited for tablet based solutions, enabling the full potential of a mobile PoS system for enhanced customer service.
