

FlexiGrip Mini

FlexiGrip Mini supports the new generation of mini card payment technologies and MPOS devices making it ideal for retailers who maintain their independence in terms of their choice of payment machine. FlexiGrip Mini has a small footprint with two adjustable arms, a ratchet release mechanism and two adjustable feet to hold the device securely in place and will hold almost any payment machine or mobile phone device with dimensions up to W 10cm x L 13cm x D 3cm.

Flexibility

FlexiGrip Mini has been designed specifically to present and protect the new generation of small form factor retail technology. From PIN Entry devices (PEDs) to smart phones, FlexiGrip Mini offers swivel and or tilt thus offering secret PIN entry, convenient positioning of the device for contactless transactions and somewhere to hold your smartphone when you need to make a video call.

Security

The FlexiGrip Mini has a quick release at the back of the device, feet at the bottom and rubber arms to hold your device in place. To ensure your machine is safe from theft or malicious intent you can add a tether that connects to the stand and device, allowing the devices to be removed from the stand whilst still being secure.
